

WEBSITE HANDOVER REPORT

Yash Ply & Hardware

What we built, why the content is clearer, and how SEO helps more customers find you online.

Prepared for client review

Based on: Website Review & Product Reference (client brief)

Business: Yash Ply & Hardware, Bhavani Peth, Pune

This report is a clear summary of the website update. It shows what changed from your review notes, how we made the words easier to understand, and how we set up search (SEO) so people searching for plywood, hardware, laminates and veneers in Pune can find Yashply.

In short: The site now has four full product lines, less repeated content, clearer buttons, simpler English for customers, and strong search titles, descriptions and keywords on key pages.

1. Overall feedback from your review

Your ask	What we did
Keep a clean structure, make the site more informative	More product detail on all lines. Added full Laminates and Veneers sections.
Reduce repetition	Different images per section. Fresh trust-bar text. End-of-page CTAs change by page, not the same message everywhere.
More product detail / easier to explore	Category pages + detail pages with types, colours, finishes, uses and specs.
Section-specific CTAs	Buttons now match the page (Explore Plywood, Explore Hardware, Enquire Now, Help Me Choose, and so on).

2. Areas to improve: status

A. Avoid repeating the same images and information

Issue	Change
Same photo reused as kitchen, living, etc.	Kitchen, living, hardware, laminates and veneers now use different visuals.
Same quality / ready-stock messaging repeated	Trust bar rewritten. Final CTA band is page-aware (different headline, image and button per section).
Same "Get a Quote" everywhere	Product pages use Enquire Now , Explore... , View... , or Help Me Choose as needed.

B. Add more product details

On each product / category page (where it applies), visitors can now see:

- Available types / options
- Colours / tones / designs
- Finishes and textures
- Where it can be used
- Sizes / thicknesses
- Key features and specifications
- Brand references (for surfaces)
- A clear enquire path

Plywood & Hardware: existing catalogues kept, with dedicated detail pages.

Laminates & Veneers: new catalogues and pages (see sections 3 to 5).

C. Section-specific CTAs

Section	Button on site
Plywood	Explore Plywood
Hardware	Explore Hardware
Laminates	Explore Laminates
Veneers	Explore Veneers
Brands	See All Brands / View Brands
Product detail	Enquire Now
General requirement	Get a Quote
Need help choosing	Help Me Choose

3. Laminates (new)

Manufacturer catalogues were used **only as references** to structure content. Final text is written for Yash Ply & Hardware.

Brands referenced

Brand	How we used it
Merino	Helped shape types and finishes language
Royale Touche	Helped shape categories, colours, textures and uses
Greenlam	Helped shape collection-style browsing and finish families
CenturyLaminates	Helped shape colour / texture / pattern presentation

Laminate categories on the website

- 1. Solid Colours
- 2. Woodgrains
- 3. Stone & Marble
- 4. Textured Surfaces
- 5. Decorative & Abstracts
- 6. High Gloss & Matte

Each has: summary, description, colours, finishes, designs, sizes/thicknesses, applications, features, brands, specs, and enquire.

4. Veneers (new)

Brand	How we used it
CenturyVeneers	Natural and reconstituted ranges used as references for types and tones

Veneer categories on the website

- 1. Natural Veneers
- 2. Reconstituted Veneers
- 3. Light & Medium Tones
- 4. Dark & Exotic Tones

Each has: colours/tones, finishes, designs, applications, features, collections note, specs, and enquire.

5. How catalogue fields map to the site

Laminates Colour → colour chips Design → designs / patterns Finish → finishes & textures Brand → brand + category copy Size / thickness → sizes & thicknesses Use → “Where it works”	Veneers Type → natural / reconstituted pages Tone → light-medium / dark + colour chips Finish / grain → finishes & designs Collection → collections note Use → “Where it works”
--	--

Note: Individual manufacturer product codes are not listed as a full static catalogue (stock changes). Customers enquire for current shades and codes at the Pune yard.

6. Product page structure (implemented)

Product Category	→ /plywood /hardware /laminates /veneers
↓	
Types / Options	→ category cards + nav menus
↓	
Designs / Finishes	→ detail page chip groups
↓	
Applications	→ “Where it works”
↓	

Product Details → specs, features, brands

Enquire / Quote → Enquire Now + quote form + Help Me Choose

Example (Laminates): Solid Colours → Woodgrains → Stone & Marble → Textured → Decorative → Gloss/Matte.
Each type has description, visual and enquire.

7. Brief next steps: completed

Next step from brief	Status
Review catalogues from brands listed	Done (used as reference for structure and language)
Shortlist categories relevant to Yash Ply	Done: 6 laminate types, 4 veneer types, plus plywood and hardware
Collect basic product information	Done: Yash Ply written summaries and specs
Make product sections more detailed	Done: list + detail templates
Replace repeated images	Done: per-section visuals / category art for surfaces
Keep CTAs specific	Done: see section 2C
Finalise content before design polish	Content updated and ready for client review

8. New and updated URLs (for checking)

URL	Purpose
/products	All four product lines with section CTAs
/plywood · /plywood/:slug	Plywood list + detail
/hardware · /hardware/:slug	Hardware list + detail
/laminates · /laminates/:slug	New laminates list + detail
/veneers · /veneers/:slug	New veneers list + detail
/brands	Hardware brands
/quote	Get a Quote
/contact	Contact, form, map, Help Me Choose
/about	About Yash Ply story and leadership

Also updated: Home “Our Products” (4 lines), navbar (desktop + mobile), products mega menu, footer, search, and Final CTA band.

9. Important note (honoured)

Manufacturer catalogues were used **only as product references**. All customer-facing text is written for **Yash Ply & Hardware**. It explains how the yard helps customers choose materials. It is not copied catalogue marketing.

10. Content rewrite: simpler English that sells better

After building the structure, we reviewed the words on the main pages. A lot of the earlier copy used long, “fancy” phrases. That can look polished to a designer, but it is hard for a busy customer, carpenter or contractor to understand quickly.

Why we changed the content

- **Customers decide fast.** Clear words help them trust you and take the next step (call, enquire, visit).
- **Your buyers are practical.** They care about grade, size, brand and delivery, not poetic lines.
- **Simple English ranks and converts.** Search engines and people both prefer clear, useful text.
- **One voice across the site.** Home, About, Products, Plywood, Hardware, Laminates, Veneers, Brands and Contact now feel consistent.

What we changed (examples)

Before (hard to read)	After (simple and clear)
“A Legacy Built on Trust. A Journey Driven by Relationships.”	“Trusted Since 1998. Built on Relationships.”
“Precision in Every Detail.” / “Natural Character. Matched Runs.”	“Fittings That Work Every Day.” / “Real Wood Look. Easy to Match.”
“Where our materials go to work.”	“Where our materials are used.”
“Eight reasons a carpenter sends the next client.”	“Eight reasons customers come back.”
Heavy em-dash style lines that felt AI-written	Removed. Sentences now use normal commas and full stops.

Where content was updated

- **Home:** hero support text, about teaser, product lines, plywood/hardware/laminates/veneers blocks, brands, why us, uses, reviews, quality, visit/quote
- **About:** hero, story chapters, founders, values, closing CTA
- **Products hub + Plywood + Hardware + Laminates + Veneers:** heroes, section intros, help CTAs
- **Brands + Contact:** heroes, partner copy, form intro, sales CTA

Impact: Visitors understand faster what you sell, where you are, and what to do next. That reduces confusion and supports more enquiries.

11. SEO: titles, meta descriptions, keywords and structured data

SEO means helping Google (and other search engines) understand your pages and show them when people search for plywood, hardware, laminates or veneers in Pune. We did not add a separate plugin. We built a proper

SEO helper in the site that sets title, description, keywords, Open Graph tags, canonical URL and JSON-LD for each important page.

Why this matters for Yashply

- Local buyers search things like “plywood Pune”, “BWP plywood”, “hinges Pune”, “laminates Pune”.
- A strong title and description improve click-through from search results.
- LocalBusiness / ContactPage data helps Google connect phone, address and hours to your brand.
- Product list pages tell Google what you sell, with clean URLs for each line.

What we set on each key page

Tag / field	What it is	Why we use it
Page title	The blue link text in Google	Includes product + city + brand so the right searches match
Meta description	Short summary under the title	Explains the offer in one breath and invites the click
Keywords	Supporting keyword list	Covers local and product terms (plywood Pune, BWP, Hettich, Merino, etc.)
Canonical URL	Preferred page address	Avoids duplicate-page confusion
Open Graph / Twitter	Share preview title, text, image	Looks clean when shared on WhatsApp / social
JSON-LD (schema)	Machine-readable business / page data	Helps Google understand LocalBusiness, ContactPage, product lists and brands
Image alt text	Text for images	Accessibility + extra context for search

Examples of titles and descriptions we use

Page	Title (example)	Meta description focus
Home	Plywood, Hardware, Laminates & Veneers in Pune Yashply	ISI plywood, hardware, laminates, veneers; Bhavani Peth; since 1998; ready stock; delivery
About	About Yash Ply & Hardware Plywood Dealer in Pune Since 1998	Founders, two generations, quality materials, on-time delivery
Products	Plywood, Hardware, Laminates & Veneers Products in Pune	Shop all four lines; commercial & BWP; brands; ready stock
Plywood	Plywood in Pune Commercial, BWP, Blockboard & More	Buy plywood grades, sizes, thicknesses at Bhavani Peth
Hardware	Furniture Hardware in Pune Hinges, Channels & Sliding Fittings	Hettich, Häfele, EBCO, Blum, Godrej and more
Laminates	Laminates in Pune Colours, Wood Looks, Gloss & Matte	Merino, Royale Touche, Greenlam, Century
Veneers	Wood Veneers in Pune Natural & Reconstituted Veneers	Natural / reconstituted; light to dark; CenturyVeneers reference
Brands	Hardware Brands in Pune Hettich, Häfele, EBCO, Blum & More	Brand list + fittings under one roof
Contact	Contact Yash Ply & Hardware Pune Call, Visit or WhatsApp	Phone, New Timber Market address, hours, WhatsApp

Keyword themes we cover

plywood Pune, plywood dealer Pune, BWP plywood, commercial plywood, ISI plywood, block board Pune, furniture hardware Pune, hinges, telescopic channels, sliding wardrobe fittings, Hettich, Häfele, EBCO, Blum, laminates Pune, Merino, Greenlam, Century laminates, wood veneers Pune, CenturyVeneers, Yashply, Yash Ply & Hardware, Bhavani Peth, New Timber Market.

Structured data (JSON-LD) by page type

- **Home:** LocalBusiness + WebSite + product-line ItemList
- **About:** AboutPage with founder / MD details
- **Products / Plywood / Hardware / Laminates / Veneers / Brands:** CollectionPage + ItemList
- **Contact:** ContactPage + LocalBusiness (phone, address, hours, geo)

SEO impact in plain words: When someone in Pune searches for the materials you sell, Google has a clearer title, description, address and product list to show. That supports more visits and more calls from the right customers.

12. What you can check next

1. Walk Home → Products → each product line → a detail page → Enquire / Quote
2. Check About story and Contact form + map

3. Confirm brand list and hardware categories match yard reality
4. Share this PDF with stakeholders as the official handover of the review build

Prepared for client review with the updated Yash Ply & Hardware website build.

Document covers review items, content simplification, and SEO setup. No em-dash styling in customer copy.
